Subject: emerging contaminants

Categories: PFOA

Hi Sandy – I spoke with Deb later in the day after our SAC meeting. She would like the SAC to develop a plan for ANR to deal with emerging contaminants such as PFOA. I need to form a sub-committee to help me with this one. EPA already has a list but I don't think that anyone here tracks the items on the list. I don't think we would be re-inventing the wheel – just getting up to date on what is already tracked through drinking water, surface water, air and waste and develop a plan for how we can track emerging issues. I thought I'd ask Mike, Scott, Heidi (?) and Leslie's alternate to help me. Any comments? Are you in Montpelier at all this week?

Sincerely,
Marjorie Gale
