Hi Danika,

Alyssa wanted version 7 for the legislature. It would be a good topic for the PFOA meeting. Thanks!

Rebecca,

I will post Version 6 on the website (not Version 7), just to be safe. I think we have to give Version 7 some lag time so that residents can be notified of their results before it goes public. However, Version 7 may be appropriate to share with the Legislature tomorrow, since that is a special setting. Your call. Alex, do you know where we're at? Or Glenn?

It's unclear to me the exact "wait time" is before we can share maps publically on the web. It was supposed to be 1-2 business days (as I was last told), but now it seems we have multiple maps being produced per day.

I'm attending the PFOA briefing tomorrow morning—I hope we can clear up some of our communications structure on this so I can provide you with firm answers next time.

Thanks,
Danika

Hi Danika,

Thank you! For Alyssa's testimony tomorrow, Renita has printed out 13 copies of version 7. Is that the version that will be posted on the website?

Hi Alex and Danika,

Could you make sure this map is posted to the website by Wednesday at 10 AM? Deb M and Alyssa have testimony in the legislature tomorrow and we need the most current map posted on the website. Thanks!

Rebecca

Attached to this email is the latest map of the North Bennington PFOA Drinking Water Sampling effort. We've had the opportunity to conduct some deeper QC that's resulted in several address corrections. Please disregard all previous versions of the map. Also **unless provided permission by Alyssa, Chuck Schwer or Richard Spiese, do not share this map with anyone outside the Department.** Instead, refer them to whatever is available via our public website: <http://www.anr.state.vt.us/dec/PFOA.htm>. Ensure any staff you share this map with also understand this caveat. This allows us time to directly contact affected residents with information regarding their water before they find out through other means.

Thank you,
-Alex
