RE: Supplemental Site Investigation Work Plan-Rev 1, Prepared by CT Male,
Former Chemfab Facility, Water Street, North Bennington, Vermont (SMS Site #20164630)

Dear Mr. Canning:

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has received and reviewed the CT Male Associates Supplemental Site Investigation Work Plan-Rev 1 dated January 12, 2018, for the former Chemfab facility on 1030 Waters Street. This revision has addressed our technical comment specified in our letter dated December 12, 2017. However, the work plan did not include a timeline for this work as specified in Paragraph 12(a) of Appendix A of the Consent Order. Therefore, the SMS approves the work plan contingent on receiving an acceptable timeline for completing the tasks in the work plan. Please provide this timeline by January 19, 2018, for our review and approval.

Thank you for your attention to this matter and we look forward to receiving the timeline and for work to begin in late January or early February. If you have any questions, please do not hesitate to contact Richard Spiese or me.

Sincerely,

John Schmeltzer, Co-Project Manager
Sites Management Section
