
Table of Contents

Chapter 1. Introduction	1
Goals of this Manual	1
What are Wetlands, and Why Restore Them?	2
Wetland Types	2
Functions and Values	3
Restoring Natural Ecological Processes	3
Chapter 2. Background Assessment and Planning	4
Site Selection	4
Site Assessment	6
Site Assessment Worksheet	9
Developing a Restoration Plan	13
Plan Components	14
Submitting A Restoration Plan	14
Chapter 3. Wetland Restoration Practices	15
3.1 Passive Restoration	16
3.2 Invasive Species Control & Management	18
3.3 Wetland Revegetation and Enhancement	22
3.4 Ditch Plugs	26
3.5 Fill Drainage Ditches	29
3.6 Remove Sediment and Fill	32
3.7 Surface Drainage Reroutes	35
3.8 Tile Drain Blocks	38
3.9 Hummock/Hollow Creation	42
3.10 Shallow Depressions/Scrapes	45
3.11 Supplemental Practices	48
Chapter 4. Regulatory Considerations	55
Federal Regulations	56
State Regulations	57
Local Regulations and Property-Specific Restrictions	59
Choose Your Monitoring Protocols	60
Chapter 5. Monitoring, Evaluating Success, & Adaptive Management	60
Timelines	64
Evaluating Success	64
Adaptive Management	65
Challenges & Solutions	65
Conclusion	66
Outline for an Effective Wetland Restoration Project	66
Technical Sources	67
